On The Christian Principle of Hope with the Vatican

By Frei Betto

I. Principle of Hope – Christian Messianism and Utopia – Fidel and Sirohi in Conversation with the Pope

In fact there is a process of Hope as well in Paulo Freire, and Fidel argues that this being practiced in India as liberation theology with the poorest. He argues in Cuba that we are learning from recent Christian stories, of Sirohi – he even is a person who follows the Christian painting, Greek painting and learning in education and even teaching each day – the Bible Sirohi follows according to Fidel is a militant view of St. Matthew as well and is making images of Christ in his house as painting. He even follows Pasolini's cinema and epistles – I call him a Chrisitian leading activist and leader in fact.

II. Fidel on Sirohi again with the Pope from Vatican

Fidel Castro argues that the Pope is also free in this process – he is celebrating the Bibles being written and published. I myself Fidel argues see all of this as developments of an authentic type – I myself have read a lot of the Bibles – from young Christ, to black Jeremiah, to even the Jerusalem Bible – a figure of a revolutionary, doctor and even

finally Prophetic advice and Jewish scripture and poetry and naivity – this then is a new revolutionary Sirohi, who follows the old revolutionary closely Christ, and only Christ our saviour – which means spiritual life is developing along the path of Christ closely I mean.

III. Fidel is in a Mercedes again in the Night following Sirohi

After a long defeat, Fidel has freed Cuba again, and they have won. That event is now ongoing. I see Fidel in India, listening to Sirohi, supporting him fully.
